

This message serves as proof of my support for XM Satellite Radio. Any attempt by the National Association of Broadcasters (NAB), or anybody else, is strongly discouraged. It is my belief that XM Satellite Radio is one of the best advances in entertainment to come around in quite a long time.

For an eclectic music listener, such as myself, XM Satellite Radio provides me with the option to listen to genres of music that are not currently available on commercial radio stations. The fact that XM Satellite Radio is commercial free further enhances my listening pleasure. The recent addition of XM Instant Traffic & Weather is a great tool and functions well for those who travel a great deal. Especially the nations truck drivers.

I respectfully urge you to reject NAB's petition 04-160 and allow XM Satellite Radio to continue to provide the quality service and programming that we subscribers deserve.

Thank you for your time and consideration on this matter.
